

PETER RC HAYNES // PHOTOGRAPHER

PROFILE

Peter's love for photography stems from his introduction to the medium at a young age, he began to document his friends and adventures whilst combining his other passion for BMX, as a means of capturing these memories and to share the images with others. His appreciation of the land, one of the reoccurring themes within his work stems from this childhood spent out doors. Utilising the medium of photography and sculpture he hopes to document these interactions within the landscape through the camera. A passion for sharing images, experiences, and the ongoing excitement of discovering new places, come together to create the main driving force in his life and work.
